PROFESSIONAL SUMMARY

As an operations and governance leader with experience coordinating cross-functional delivery, building reporting frameworks, improving operational controls, and implementing structured processes that increase visibility, support decision-making, and reduce manual effort across complex platforms.

A big part of my work is turning unclear or manual ways of working into structured, repeatable processes. I've built dashboards, documentation and workflow automations that improve visibility, reduce manual effort and support better decision-making. I'm used to working across teams, managing competing priorities and helping delivery stay on track in fast-moving environments.

KEY ACHIEVEMENTS

- Serve as the central communication hub between multiple teams, running regular WIPs and coordinating cross-functional workflows across Sales, Marketing, Ad Ops, Product, Dev, and third-party partners.
- Created comprehensive process documentation for the CRA platform — building clear policies and procedures that reduced reliance on institutional knowledge and made operations scalable.
- Built performance dashboards that replaced hours of manual reporting, giving leadership actionable insights that directly shaped strategy and operational improvements.
- Delivered a successful AFL/NRL live sports season with minimal disruption — managing high-stakes, time-sensitive operations where reliability and on-time delivery are non-negotiable.
- Led a platform-wide audit of legacy content, coordinating across multiple teams to clean out outdated assets — improving system performance, data accuracy, and operational efficiency.
- Designed automated workflows in Smartsheet that turned complex processes into clear frameworks for stakeholders — cutting manual overhead and speeding up decision-making.

CORE COMPETENCIES

- **Governance & Operations:** Operational planning, process improvement, workflow design, compliance support, continuous improvement, issue triage, documentation.
- **Reporting & Data:** Reporting frameworks, KPI tracking, performance dashboards, data accuracy, trend analysis, leadership reporting
- **Stakeholder Management:** Cross-functional coordination, senior stakeholder communication, issue escalation, meeting cadences, policy and process alignment
- **Systems & Tools:** Smartsheet, Jira, Microsoft Office Suite, workflow automation, process documentation, systems optimisation

PROFESSIONAL EXPERIENCE

Southern Cross Austereo (Hit Network, Triple M & LiSTNR) | 2016 – Present

LiSTNR Operations Manager | 2022 – Present

- Drove operational continuity across the LiSTNR distribution platform by leading cross-functional coordination between Product, Engineering, Commercial and Support teams, ensuring alignment on priorities and delivery timelines across every active workstream
- Improved operational efficiency and scalable operations by designing and implementing standard operating procedures, workflow design frameworks and processing documentation that reduced reliance on institutional knowledge across 10+ core operational processes.
- Reduced reporting time by 60% by building performance dashboards and weekly reporting frameworks that gave leadership real-time visibility of platform health, delivery risks and operational issues.

- Minimised operational disruption through proactive issue identification, daily operational checks and escalation management — coordinating root cause analysis across internal teams to resolve platform issues efficiently and maintain seamless experience delivery.
- Strengthened platform health and data accuracy by leading a platform-wide audit of legacy content and back-office configuration, coordinating across 6+ teams to remove outdated assets and improve compliance with operational standards.
- Embedded more effective ways of working through internal stakeholder management and cross-team collaboration, facilitating WIP meetings and team alignment meetings that kept Product, Engineering, Commercial and Support teams coordinated on shared delivery goals.

Digital Audio Coordinator | 2020 – 2022

- Ensured seamless experience delivery across 100+ distribution platforms by managing the weekly publishing pipeline for 100+ radio podcasts and live shows, maintaining on-time delivery and operational accuracy through structured process documentation and daily operational checks.
- Reduced reporting time by 40% by building performance dashboards that replaced manual data collation with automated visibility of content delivery and operational performance metrics.
- Maintained operational continuity during high-stakes live sport broadcasts by coordinating external partner management and internal cross-team collaboration to identify, triage and resolve distribution issues quickly — delivering 250+ live sport seasons with minimal disruption.

Digital Production Designer & Administrator | 2016 – 2020

- Delivered scalable operations across Hit Network and Triple M by managing day-to-day content publishing and platform configuration, maintaining brand consistency, quality standards and on-time delivery across 60+ active shows or content streams.
- Improved platform health and operational efficiency by maintaining back-office CMS hygiene, conducting proactive issue identification, and performing root cause analysis on system-wide technical issues — driving compliance with operational standards and reducing recurring faults.

Fortress Events & Funky Bunch Trivia | Freelance / Side Venture | 2021 – Present

- Demonstrated adaptability and problem-solving in high-pressure environments by running end-to-end live event operations — managing AV setup, on-site cross-team coordination and live troubleshooting, with post-event reporting used to drive continuous process improvement across 50+ events.

EDUCATION

Graduate Certificate in UX Design – RMIT University (2024) | UX Research, Usability Testing, Prototyping, Data Visualisation

Graduate Diploma in Radio Production – Australian Film, Television and Radio School (AFTRS) (2016)

Certificate in Radio Production – TAFE NSW (2015)

TECHNICAL SKILLS

- **Data & Reporting:** Performance Dashboards, KPI Monitoring, Data Visualisation, Smartsheet (incl. Bridge Automation), Triton, Brandwatch, Microsoft Office Suite
- **Project & Workflow:** Jira, Confluence, Smartsheet, Lucidchart, Workflow Automation, Change Management, Process Documentation, Power Automate
- **Creative:** Adobe Photoshop, Illustrator, Premiere Pro (Audio/Video Editing), Canva
- **Emerging Tech:** AI Platforms, Workflow Automation, Agent-Based Solutions, UX Research & Prototyping
